Appln. No. 09/751,801 Amendment dated April 26, 2004 Reply to Office Action mailed January 26, 2004

This listing of claims will replace all prior versions, and listings, of claims in the application:

<u>Listing of Claims</u> (deleted text being struck through and added text being underlined):

- 1 l. (Original) A method for broadcast advertising to a mobile 2 communication device, comprising the steps of:
- 3 storing acceptance data in the communication device;
- 4 receiving by the communication device a broadcast advertisement
- 5 containing advertisement data; and
- 6 comparing the advertisement data to the acceptance data to obtain; a
- 7 comparison result.
- 1 2. (Original) The method of claim 1, wherein the broadcast
- 2 advertisement is received by the communication device through a wireless
- 3 communication channel.
- 3. (Original) The method of claim 2, wherein the broadcast
- 2 advertisement is received by the communication device through one of: a
- 3 radio transmission, a television transmission, a Bluetooth signal, and an
- 4 infrared signal.
- 1 4. (Original) The method of claim 1, wherein the broadcast
- 2 advertisement is received by the communication device from one of: a
- 3 billboard and a storefront.
- 5. (Original) The method of claim 1, wherein the acceptance data
- 2 comprises preferences for accepting broadcast advertisements specified by a
- 3 user of the communication device.

Appln. No. 09/751,801 Amendment dated April 26, 2004 Reply to Office Action mailed January 26, 2004

- 6. (Original) The method of claim 1, further comprising the step of modifying the acceptance data by integrating entries from a personal information manager.
- 7. (Original) The method of claim 1, further comprising the step of displaying the broadcast advertisement on the communication device based on the comparison result.
- 8. (Original) The method of claim 1, further comprising the step of storing the broadcast advertisement on the communication device based on the comparison result.
- 9. (Original) The method of claim 8, further comprising the steps of: reading deletion data in a stored advertisement, wherein the deletion data indicates criteria for deleting the stored advertisement; and deleting the stored advertisement from the communication device based on the deletion data.
- 1 10. (Currently Amended) The method of claim 1, further comprising
 2 the step of outputting a notification signal to a user of the communication if
 3 comparison of the advertisement data to the acceptance data is accepted.
- 1 11. (Original) The method of claim 1, further comprising the step of sending an indicator signal to a source of the broadcast advertisement, wherein the indicator signal notifies the source that the communication device is within a broadcast range of the broadcast advertisement.
- 1 12. (Original) The method of claim 1, further comprising the step of communicating through the communication device with a wireless positioning system.
- 1 13. (Original) The method of claim 12, wherein the wireless 2 positioning system is GPS.

Appln. No. 09/751,801 Amendment dated April 26, 2004 Reply to Office Action mailed January 26, 2004

- 1 14. (Original) A method for broadcast advertising to a mobile 2 communication device, comprising the steps of:
- receiving by the communication device one or more broadcast advertisements; and
- selecting at least one of the received advertisements based on preferences for selecting advertisements specified by a user of the communication device.
- 1 15. (Original) The method of claim 14, wherein the broadcast 2 advertisements are received from a transmitter when the communication 3 device is within a broadcast range of the transmitter.
- 1 16. (Original) The method of claim 14, wherein the broadcast 2 advertisements are received from a local transmitter by the communication 3 device through a wireless communication channel.
- 1 17. (Original) The method of claim 14, further comprising the step of modifying the preferences for selecting advertisements specified by the user of the communication device by integrating entries from a personal information manager.
- 1 18. (Original) The method of claim 14, further comprising the step of displaying the selected broadcast advertisements to the user of the communication device.
- 1 19. (Original) A mobile communication device, comprising:
- 2 memory;

data; and

5

- 3 logic for storing acceptance data on the memory;
- 4 logic for receiving a broadcast advertisement containing advertisement

Appln. No. 09/751,801 Amendment dated April 26, 2004 Reply to Office Action mailed January 26, 2004

- logic for comparing the advertisement data to the acceptance data to

 obtain a comparison result.
- 20. (Original) The mobile communication device of claim 19, wherein the logic for receiving the broadcast advertisement is capable of receiving the broadcast advertisement through a wireless communication channel.
- 21. (Original) The mobile communication device of claim 20, wherein the logic for receiving the broadcast advertisement is capable of receiving the broadcast advertisement through one of: a radio transmission, a television transmission, a Bluetooth signal, and an infrared signal.
- 22. (Original) The mobile communication device of claim 19, wherein the acceptance data comprises preferences for accepting broadcast advertisements specified by a user of the communication device.
- 23. (Original) The mobile communication device of claim 19, further comprising logic for modifying the acceptance data by integrating entries from a personal information manager.
- 1 24. (Original) The mobile communication device of claim 19, further 2 comprising:
- 3 a display; and
- logic for displaying the broadcast advertisement on the display based on the comparison result.
- 25. (Original) The mobile communication device of claim 19, further comprising logic for storing the broadcast advertisement on the memory based on the comparison result.
- 1 26. (Original) The mobile communication device of claim 19, further comprising logic for communicating with a wireless positioning system.

- 27. (Original) The mobile communication device of claim 26, wherein 1 2 the wireless positioning system is GPS.
- 28. (Original) A system for broadcast advertising to a mobile 1 communication device, comprising: 2
- 3 logic for receiving acceptance data from the communication device;
- logic for selecting one or more advertisements based on the received 4 5 acceptance data; and
- 6 logic for broadcasting the selected advertisements to the 7 communication device.
- 29. (Original) The system of claim 28, further comprising logic for 1 detecting whether the communication device is within a broadcast range, 2 and further wherein the logic for broadcasting the selected advertisements is 3 capable of broadcasting the selected advertisements to the communication 4 device upon detecting that the communication device is within the broadcast
- 5
- 6 range.
- 30. (Original) The system of claim 28, wherein the logic for 1
- 2 broadcasting the selected advertisements is capable of broadcasting the
- selected advertisements to the communication device through a wireless 3
- communication channel.
- 1 31. (Original) The system of claim 28, wherein the acceptance data
- 2 comprises preferences for accepting broadcast advertisements specified by a
- 3 user of the communication device.
- 32. (Original) The system of claim 28, further comprising logic for 1
- 2 communicating with a wireless communication channel.
- 33. (Original) A system for broadcast advertising, comprising: 1
- 2 a mobile communication device capable of storing acceptance data 3 thereon; and

acceptance data.

Appln. No. 09/751,801 Amendment dated April 26, 2004 Reply to Office Action mailed January 26, 2004

- an advertisement broadcasting system capable of transmitting one or
 more broadcast advertisements to the mobile communication device;
 wherein the mobile communication device is capable of receiving the
 broadcast advertisements from the advertisement broadcasting system and
 selecting at least one of the broadcast advertisements based on the
- 34. (Original) The system of claim 33, wherein the advertisement broadcasting system is capable of detecting whether the mobile communication device is within a broadcast range, and further wherein the advertisement broadcasting system is capable of transmitting the broadcast advertisements to the mobile communication device upon detecting that the mobile communication device is within the broadcast range.
- 35. (Original) The system of claim 33, wherein the advertisement broadcasting system is capable of transmitting, and the mobile communication device is capable of receiving, the broadcast advertisements through a wireless communication channel.
 - 36. (Original) The system of claim 33, wherein the acceptance data comprises preferences for accepting broadcast advertisements specified by a user of the mobile communication device.
- 37. (Original) The system of claim 33, wherein the mobile communication device and the advertisement broadcasting system are capable of communicating with a wireless positioning system.
